CFO Insights Series

Automating Regulatory and Finance
Reporting

The immediate positive impact of financial performance management

Management decision framework

EMERGENCY MODE

Cost Freeze
Keep essential services open
Enable home working
Support changed channel use

JUNE TO SEPTEMBER

Cost Cutting
New credit policies
Support operational delivery
Evaluate automation options

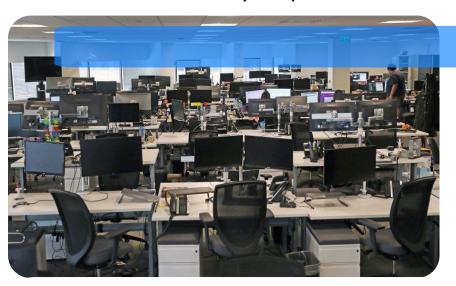

OCTOBER ONWARDS

Cost Optimization
New channel delivery
Accelerate digital
Advanced scenario planning

CLOUD BASED PERFORMANCE MANAGEMENT

Centralised on your premises

Support for remote working

Decentralised cloud capabilities

Everything Changes

Manual processes, on-premises systems, and IT ownership give way to cloud first, 100% remote delivery, automated processes, and business ownership.

A New Normal

Staff are no longer on your premises and are accessing bank network systems from home. Move to decentralized cloud capabilities.

Agile Strategic Planning

Optimise costs by investing in cloud capability that maximises your ability to measure, monitor, and manage your financial performance.

POLLING QUESTION #1

Do senior management have a need for automated daily reporting and analytics for the loan and deposit portfolio?

A: Yes, our current processes are too manual

B: No, we already have this capability

C: N/A

Measure + Monitor = Manage

Banking

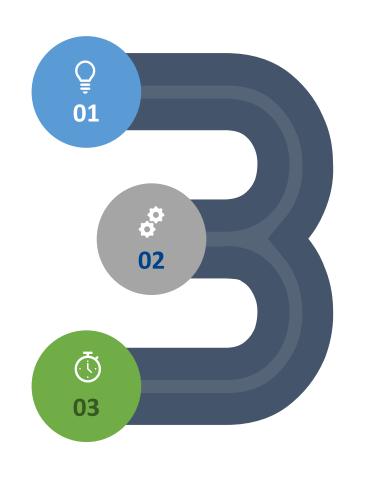

Track all loans and deposits daily in a comprehensive analysis to provide an early warning of any financial implications before they occur.

Financial Performance

Track your financials daily as business adapts and events unfold.

How is BankBI investing to help?

01

Free demo access

No obligation free access to fully featured online demo system to help you familiarize yourself with the application.

02

No service fee

100% remotely delivered services with all fees waived between June and September.

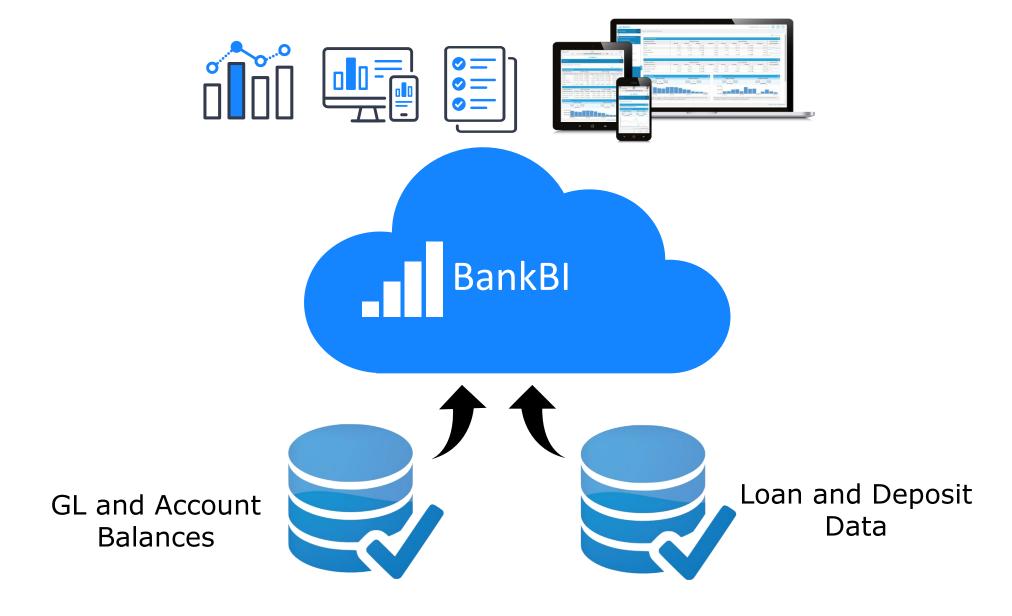

03

Try before you buy

1-month fee evaluation and use of the application before you commit. Thereafter, PAYG on rolling 30-day basis.

Analytics out of the box

Cloud based rapid speed to value

Integrations

FusionBanking Equation

A UK bank chose BankBI to solve liquidity reporting challenges after it was acquired by an overseas banking operation.

The management team were so impressed with the implementation, operation and support they received that they extended their relationship with BankBI to include Financial Performance and Banking Performance software.

The bank has recently started rolling out these products with data integration to their FusionBanking Equation core banking system. It now supports analysis within the finance department and at the executive level with the introduction of a daily balance sheet and daily performance scorecards, which they were not able to generate historically.

 $BankBI\ now\ enables\ the\ bank\ to\ share\ their\ management\ board\ packs\ with\ the\ head\ office\ investors\ in\ the\ bank.$

Why we work in these areas

Mali

Niger

Chad

Sudan

We focus on the poorest communities where VisionFund loans can make the biggest impact. We measure our impact in terms of the number of children who benefit. In Africa the majority of the population lives on less than \$2 a day. An investment of \$1,000 can transform the lives of 31 children. In Asia, the same sum will reach 14 children. By 2014 we will be focusing even more on Africa and Asia to benefit more children than ever.
